Prefects will be selling merchandise at recess and lunch to help support such a worthy cause. Puppy dogs are $6 and pens, broaches and wrist bands are $2.
  - What is Motor Neuron Disease (MND)? It is the name given to a group of diseases in which the nerve cells (neurones) controlling the muscles that enable us to move, speak, breathe and swallow undergo degeneration and die. The lower motor neurones exit the spinal cord and directly activate muscles. With no nerves to activate them, muscles gradually weaken and waste. There is no cure or treatment.
